</table>

Tender Documents may be downloaded from Central Public Procurement Portal [http://eprocure.gov.in/eprocure/app](http://eprocure.gov.in/eprocure/app). Aspiring Bidders who have not enrolled / registered in e-procurement should enroll / register before participating through the website [http://eprocure.gov.in/eprocure/app](http://eprocure.gov.in/eprocure/app). The portal enrolment is free of cost. Bidders are advised to go through instructions provided at 'Instructions for online Bid Submission'.

Tenderers can access tender documents on the website (For searching in the NIC site, kindly go to Tender Search option and type ‘IIT’. Thereafter, Click on “GO” button to view all IIT Delhi tenders). Select the appropriate tender and fill them with all relevant information and submit the completed tender document online on the website [http://eprocure.gov.in/eprocure/app](http://eprocure.gov.in/eprocure/app) as per the schedule given in the next page.

No manual bids will be accepted. All quotation (both Technical and Financial should be submitted in the E-procurement portal).

**CHAIRMAN PURCHASE COMMITTEE (BUYER MEMBER)**
Instructions for Online Bid Submission/ऑनलाइन बोली (बिड) के लिए निर्देश:
As per the directives of Department of Expenditure, this tender document has been published on the Central Public Procurement Portal (URL: http://eprocure.gov.in/eprocure/app). The bidders are required to submit soft copies of their bids electronically on the CPP Portal, using valid Digital Signature Certificates. The instructions given below are meant to assist the bidders in registering on the CPP Portal, prepare their bids in accordance with the requirements and submitting their bids online on the CPP Portal.

More information useful for submitting online bids on the CPP Portal may be obtained at:
http://eprocure.gov.in/eprocure/app

REGISTRATION

1) Bidders are required to enroll on the e-Procurement module of the Central Public Procurement Portal (URL: http://eprocure.gov.in/eprocure/app) by clicking on the link “Click here to Enroll”. Enrolment on the CPP Portal is free of charge.

2) As part of the enrolment process, the bidders will be required to choose a unique username and assign a password for their accounts.

3) Bidders are advised to register their valid email address and mobile numbers as part of the registration process. These would be used for any communication from the CPP Portal.

4) Upon enrolment, the bidders will be required to register their valid Digital Signature Certificate (Class II or Class III Certificates with signing key usage) issued by any Certifying Authority recognized by CCA India (e.g. Sify / TCS / nCode / eMudhra etc.), with their profile.

5) Only one valid DSC should be registered by a bidder. Please note that the bidders are responsible to ensure that they do not lend their DSCs to others which may lead to misuse.

Please note that these are only partial translations and the full document should be referred to for accurate and complete information.
6) Bidder then logs in to the site through the secured log-in by entering their userID / password and the password of the DSC / eToken.

बोलीदाता फिर अपने यूजर आईडी / पासवर्ड और डीएससी / इटीक एं के पासवर्ड को दर्ज करके सुरक्षित लॉग-इन के माध्यम से साइट पर लॉग ऑन करता है।

SEARCHING FOR TENDER DOCUMENTS/निविदा दस्तावेजों के लिए खोजना

1) There are various search options built in the CPP Portal, to facilitate bidders to search active tenders by several parameters. These parameters could include Tender ID, organization name, location, date, value, etc. There is also an option of advanced search for tenders, wherein the bidders may combine a number of search parameters such as organization name, form of contract, location, date, other keywords etc. to search for a tender published on the CPP Portal.

सीपीपी पोर्टल में दिए गए दिकल्प हैं, ताकि बोलीदाताओं को कई मापदंडों से सक्रिय निविदा दस्तावेज सकारून हो सकते हैं। ये दिकल्पों के लिए उल्लिखित खोज का एक विकल्प भी है, जिसमें बोलीदाता कई नामों को जोड़ सकते हैं जैसे संगठन का नाम, अनुदान का स्थान, वरिष्ठ निविदा पर प्रकाशित निविदा की खोज के लिए ताजा, अन्य कीवर्ड आदि।

2) Once the bidders have selected the tenders they are interested in, they may download the required documents / tender schedules. These tenders can be moved to the respective ‘My Tenders’ folder. This would enable the CPP Portal to intimate the bidders through SMS / e-mail in case there is any corrigendum issued to the tender document.

बोलीदाताओं ने एक बार निविदा दस्तावेजों चुनी हैं जिसमें वे रुचि रखते हैं, उसका वे आवश्यक दस्तावेज / निविदा कार्यक्रम डाउनलोड कर सकते हैं। ये निविदा दस्तावेजों वन्हें ले जाईंजा सकती हैं। इससे सीपीपी पोर्टल को बोलीदाताओं को एसएमएस / ई-मेल के माध्यम से सूचित किया जा सकता है, यदि निविदा दस्तावेज में कोई अद्वितीय निविदा आईडी का नोट बनाना चाहिए, तभी वे हेल्पडेस्क से कोई स्पष्टीकरण / सहायता प्राप्त करना चाहते हैं।

3) The bidder should make a note of the unique Tender ID assigned to each tender, in case they want to obtain any clarification / help from the Helpdesk.

बोलीदाता को प्रत्येक निविदा को निर्दिष्ट अद्वितीय निविदा आईडी का नोट बनाना चाहिए, अगर वे हेल्पडेस्क से कोई स्पष्टीकरण / सहायता प्राप्त करना चाहते हैं।

PREPARATION OF BIDS / बोली (विद) की तैयारी

1) Bidder should take into account any corrigendum published on the tender document before submitting their bids.

बोलीदाता को अपनी बोलीयां जमा करने से पहले निविदा दस्तावेज पर प्रकाशित किसी भी शुद्धि को ध्यान में रखना चाहिए।

2) Please go through the tender advertisement and the tender document carefully to understand the documents required to be submitted as part of the bid. Please note the number of covers in which the bid documents have to be submitted, the number of documents - including the names and content of each of the document that need to be submitted. Any deviations from these may lead to rejection of the bid.

कृपया बोली के भाग के रूप में जमा किए जाने वाले दस्तावेजों की समझने के लिए निविदा विज्ञापन और निविदा दस्तावेज ध्यान से देखें। कृपया उन अंकों की संख्या पर ध्यान दें जिन में बोली दस्तावेज जमा करना है, दस्तावेजों की संख्या - जिसमें प्रत्येक दस्तावेज के नाम और सामग्री शामिल हैं, जिन्हें प्रस्तुत करने की आवश्यकता है। इनमें से कोई भी विचलन बोली को अद्वितीय कर सकता है।

3) Bidder, in advance, should get ready the bid documents to be submitted as indicated in the tender document / schedule and generally, they can be in PDF / XLS / RAR / DWF formats. Bid documents may be scanned with 100 dpi with black and white option.

बोलीदाता, अग्रिम में, निविदा दस्तावेज / अनुसूची में बताए अनुसार प्रस्तुत करने के लिए बोली दस्तावेज तैयार करना चाहिए और आम तौर पर, वे पीडीएफ / एसएमएस / आईएएएस / डीडब्ल्यूएफ स्वरूप में हो सकते हैं। बोली दस्तावेजों की 100 डीपीआई के साथ काले और सफेद विकल्प स्क्रीन किया जा सकता है।
4) To avoid the time and effort required in uploading the same set of standard documents which are required to be submitted as a part of every bid, a provision of uploading such standard documents (e.g. PAN card copy, annual reports, auditor certificates etc.) has been provided to the bidders. Bidders can use “My Space” area available to them to upload such documents. These documents may be directly submitted from the “My Space” area while submitting a bid, and need not be uploaded again and again. This will lead to a reduction in the time required for bid submission process.

5) The server time (which is displayed on the bidders’ dashboard) will be considered as the standard time for referencing the deadlines for submission of the bids by the bidders, opening of bids etc. The bidders should follow this time during bid submission.
All the documents being submitted by the bidders would be encrypted using PKI encryption techniques to ensure the secrecy of the data. The data entered cannot be viewed by unauthorized persons until the time of bid opening. The confidentiality of the bids is maintained using the secured Socket Layer 128 bit encryption technology. Data storage encryption of sensitive fields is done.

The uploaded tender documents become readable only after the tender opening by the authorized bid openers.

Upon the successful and timely submission of bids, the portal will give a successful bid submission message & a bid summary will be displayed with the bid no. and the date & time of submission of the bid with all other relevant details.

Kindly add scanned PDF of all relevant documents in a single PDF file of compliance sheet.

ASSISTANCE TO BIDDERS

1) Any queries relating to the tender document and the terms and conditions contained therein should be addressed to the Tender Inviting Authority for a tender or the relevant contact person indicated in the tender.

2) Any queries relating to the process of online bid submission or queries relating to CPP Portal in general may be directed to the 24x7 CPP Portal Helpdesk. The contact number for the helpdesk is 1800 233 7315.

General Instructions to the Bidders

1) The tenders will be received online through portal http://eprocure.gov.in/eprocure/app . In the Technical Bids, the bidders are required to upload all the documents in .pdf format.

2) Possession of a Valid Class II/III Digital Signature Certificate (DSC) in the form of smart card/e-token in the company's name is a prerequisite for registration and participating in the bid submission activities through https://eprocure.gov.in/eprocure/app. Digital Signature Certificates can be obtained.
from the authorized certifying agencies, details of which are available in the web site https://eprocure.gov.in/eprocure/app under the link “Information about DSC”.

3) Tenderer are advised to follow the instructions provided in the ‘Instructions to the Tenderer for the e-submission of the bids online through the Central Public Procurement Portal for e Procurement at https://eprocure.gov.in/eprocure/app.

निविदाकर्ता को सलाह दी जाती है कि वे निविदाकार को निर्देश दिए गए हैं ताकि ई-प्रोक्योरमेंट के लिए सेंट्रल पब्लिक प्रोकॉर्मेंट पोर्टल के जरिए https://eprocure.gov.in/eprocure/app पर ऑनलाइन निविदाएं जमा कर सकें।
NOTICE INVITING QUOTATIONS

Subject: Field Emission Scanning Electron Microscope System with Spectroscopic Cathodoluminescence as a complete system.

Invitation for Tender Offers

Indian Institute of Technology Delhi invites online Bids (Technical bid and Commercial bid) from eligible and experienced OEM (Original Equipment Manufacturer) OR OEM Authorized Dealer for Field Emission Scanning Electron Microscope System with Spectroscopic Cathodoluminescence, and Low temperature stage as a complete system with (warranty period as stated at page #1 of this tender) on site comprehensive warranty from the date of receipt of the material as per terms & conditions specified in the tender document, which is available on CPP Portal http://eprocure.gov.in/eprocure/app

TECHNICAL SPECIFICATION:

<table>
<thead>
<tr>
<th>Field Emission Scanning Electron Microscope System with Spectroscopic Cathodoluminescence as a complete system</th>
<th>All the items A, B, C must be quoted all together.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Specifications</td>
<td>Details</td>
</tr>
<tr>
<td>A. Field Emission Scanning Electron Microscope</td>
<td></td>
</tr>
<tr>
<td>1. Resolution:</td>
<td>0.7 nm or better at 15 KV (vendor to submit the document showing the ultimate resolution at 15 KV and 1 KV) 1.0 nm or better at 1 KV</td>
</tr>
<tr>
<td>2. Accelerating Voltage</td>
<td>≤ 0.2–30 kV or better and continuously variable through software or controlling knob.</td>
</tr>
<tr>
<td>3. Magnification</td>
<td>25 to 10, 00,000 or higher continuously variable with auto compensation for change in working distance and accelerating voltage.</td>
</tr>
<tr>
<td>4. Probe current</td>
<td>5pA to 200 nA or better. The system should have provision for probe current measurements and setting desired values of probe current for any arbitrary KV during an experiment.</td>
</tr>
<tr>
<td>5. Specimen stage</td>
<td>All 5-axis motorized eucentric stage with minimum movements in X=100 mm, Y=100 mm, Z=50 mm, Tilt= -4 to 70 degrees (continuous) and rotation 0-360 degrees (continuous). Provision for computerized stage position storage and retrieval. Measurement on a grid with desired number of points and at several locations with image stitching.</td>
</tr>
<tr>
<td>6. Electron optical</td>
<td>Should be complete with:</td>
</tr>
</tbody>
</table>
| Column | • Schottky thermal field emission source.  
• Set of beam defining apertures, auto beam and aperture alignment, auto Focus, contrast and brightness, Adjustable stigmator, variable scan speed, scan rotation, tilt correction, EM metal shielding of column.  
• Beam Deceleration/gentle beam or equivalent to prevent sensitive sample charging and high-resolution imaging at low kV.  
• Magnetic and Electrostatic/ Super Hybrid lens/ Compound lens assembly for high resolution imaging of magnetic materials with shorter working distance.  
• SEM chamber and Electron gun should have a built in, fully integrated self-levelling pneumatic vibration isolation.  
• Full computer controls of the electron optical column and microscope function like; probe current, probe diameter, gun alignment, focus (with automatic compensation for Operating voltage change, tilt, and rotation), stigmator, etc. |
|---|---|
| 7. Specimen Holders | • Standard Sample holder for 2”, 3” and 4” circular wafers; multi specimen holder; pin/cylindrical stubs, etc. Carousel for mounting of at least six specimens.  
• Cross-sectional sample holder for holding variable sample thicknesses from 100 um to 1mm.  
• Stubs for the carousel (24 spare stubs) with box to keep them. |
| 8. Detectors | 1. ET detector for secondary electron imaging  
2. In-lens/in column/upper SED Secondary Electron detector  
3. Backscattered electron Detectors for high resolution BSE imaging at low accelerating voltages (\(\leq 0.5\)KV).  
4. In chamber IR camera fully compatible with the imaging. |
| 9. Scan Modes | • Such as raster scan with different scan speeds, spot mode, line scan mode, Depth of field mode, line scan profile, and scan rotation mode to be provided. Split screen and live multiple signal display (at least four). |
| 10. Image display and record system | • Separate High resolution 21”,or more, flat color monitor for flicker free TV-scan image, provision for digital image storage and processing, Line profile display, image annotation facilities, etc. |
| 11. Image processing | • Software to include standard functions like line and frame averaging, scan integration, and facility for measurements of distance, angle, and diameter, pseudo color display, split screen imaging mode, PIP, camera and scan mode simultaneously, frame store with variable image resolution from low to ultra-high value.  
• Possibility for automatic acquisition at several locations and image stitching should be provided. Complete compatibility with other software like for EDS and CL in terms of area selection, spectrum acquisition and other should be provided. |
<p>| 12. PC control | • Microsoft windows (latest version) compatible control software for complete system control including the HV, Vacuum system, scanning conditions, and image recording and storage etc. with auto focus, brightness, contrast etc. |
| 13. Computer control system | • Vendor to provide the required computer system complete with 21” (or more) flat color monitor and necessary hardware and controls and preloaded with control software. Computer specs should be better than |</p>
<table>
<thead>
<tr>
<th>14. Spare accessories ports</th>
<th>• (at least 10) on the chamber for addition of attachments like, Spectroscopic Cathodoluminescence, Low temperature stage, and Energy Dispersive Spectrometer. And also, for future addition of EBIC and EBSD.</th>
</tr>
</thead>
</table>
| 16. Vacuum system          | • Fully computer controlled vacuum system complete with oil free turbo molecular pump, suitable clean backing pump (oil free), ion getter pump, dry nitrogen venting provision, vacuum readout and display.  
• The system should be fully automatic with interlocking safeguards provided against power failure and any sudden shut down. The ultimate vacuum achievable should be better than $10^{-5}$Torr in the sample chamber. |
| 17. Utilities              | • Vendor to quote essential utilities like cooling water circulation system (air cooled),  
• oil free compressor with moisture trap and including the pipes and connectors and any other thing required for system operation. Table for operation console etc.  
• Also, adequate Safety provisions for vacuum, water leakage, power, N2 leakage should be available. |
| 18. User Interface         | • All the accessories required for the user interface should be provided with the system like; Keyboard, Mouse, Control panel with multifunction for the control and adjustment of frequently used SEM parameters, Manual Joystick control for stage axis. |

### B. Spectroscopic Cathodoluminescence

| Cathodoluminescence imaging and spectroscopy system compatible with the column (as detailed below) | • Cathodoluminescence collection optics consisting of retractable, diamond turned paraboloidal mirror with direct optical coupling to the monochromator for high collection sensitivity.  
• System should be capable of self-aligning and alignment routine should be capable of locating the sample at the focal point of the collection optics. Collection mirror should align to the electron optical axis delivering optimized collection efficiency and repeatable results.  
• Optional mirror thin enough to enable working at low working distances should be quoted.  
• Highly sensitive detectors covering the Wavelength ranges 190 nm – 1100 nm. This should include a high sensitivity cooled photomultiplier tube and CCD detector with suitable (preferably 1200 lines/mm blazed at 500 nm and 2400 lines/mm blazed at 240 nm) gratings.  
• The wavelength resolution should be better than 0.2 nm in visible range.  
• System electronics for control of monochromator and detector for viewing /recording of wavelength resolved spectrum as well as high resolution panchromatic and monochromatic CL images simultaneously with other imaging signals like SE.  
• Spectrum /image acquisition and processing software. The software should be capable of digital acquisition, display and storing of monochromatic as well as panchromatic images, superimposition of various monochromatic images and pseudo coloring of images, image annotation for text entry on any part of the image and should have |
various measurement functions.
- Image and spectra processing, curve fitting, and spectra processing like multiple display, image stitching, normalization, peak fitting etc., software to be provided.
- Capability of hyperspectral data collection using CCD and PMT detectors should be provided.
- Wavelength calibration standards to be provided by the vendor. Vendor to also provide calibration curves for detectors, Gratings and whole optical bench.
- System should be compatible with the FESEM and suitable interface for mounting it on the SEM column and for connecting it to the microscope optics are to be provided by the vendor.
- It should be ensured that the area scanned in the SEM image is same as the CL image frame.
- Possibility to take spectra at constant beam power by controlling the probe current.
- The system should be compatible with a low temperature stage to be attached in the FESEM
- The system should be upgradable in future to accept other modes like angle resolved spectroscopy, polarization filtered spectroscopy etc.

C. Other Requirements

1. Spares
   - One set each of Complete aperture set, metal seals, roughing pump repair kit, and assorted Fuses
   - Spare specimen holders.
   - Vendor should also provide specimen handling tools and stage tools.
   - silver paste (4 bottles 100ml each), carbon tape (at least 6 rolls), copper tape (6 rolls) of at least 50 meters length.

2. Manuals
   - Vendor to provide compulсорily complete set of service and maintenance manuals (a hard copy and in soft media) including the lay out diagrams and circuit diagrams for all electronic boards and mechanical components of FESEM system and
   - Spectroscopic Cathodoluminescence

3. Calibration Standards
   - Standard test sample to be provided by the vendor to demonstrate the ultimate resolution on FESEM.
   - Magnification calibration standard to be provided by the vendor for FESEM.

4. Installation and Training
   - It will be the responsibility of supplier for: Complete Installation of FESEM with all utilities and accessories (CL). Demonstration of full specifications using standards (to be provided by the vendors) for all the parameters in respect of FESEM, CL.
   - Two weeks on-site training on system operation and imaging after the installation is over.
   - Installation and demonstration of system performance and training of CL system.

5. Warranty
   - Vendor to provide three-year warranty on the whole system including
the FEG Gun.
- Vendor to provide three years warranty on accessories on the entire CL system.
- All expenses (including freight, customs etc) to be borne by the vendor during warranty period for replacement/repair of the faulty items.
- Vendor to have a good service network and a response time of two days in case of reported fault.
- Warranty for each component should be indicated separately.

### General Conditions to be fulfilled

<table>
<thead>
<tr>
<th>Conditions</th>
</tr>
</thead>
<tbody>
<tr>
<td>Vendor to provide a list of similar FESEM system supplied within India in the past 3 years. Vendor must have sold at least two systems in India.</td>
</tr>
<tr>
<td>Demonstration of full specifications using standards (to be provided by the vendors) for all the parameters.</td>
</tr>
<tr>
<td>Vendor to specify warranty, maintenance procedure and after sales service. Vendors will also ensure the availability of spares for at least 10 years of instrument working life.</td>
</tr>
<tr>
<td>Vendor should ensure that Licenses of all the installed software of FESEM and additional accessories shall be perpetual. Update and support of all the software shall be covered under warranty.</td>
</tr>
<tr>
<td>Vendor should provide all accessories and utilities required for full operation of FESEM. Complete system with all accessories should be compatible with standard power supply 220 V, 50 Hz single phase.</td>
</tr>
<tr>
<td>Compliance statement to each item of this document to be provided along with the technical bid.</td>
</tr>
<tr>
<td>Vendor to ensure a delivery time of 8 months from the date of confirm order acceptance.</td>
</tr>
</tbody>
</table>

### Optional Items to be quoted separately

#### I. Energy Dispersive X-ray Microanalysis System

<table>
<thead>
<tr>
<th>Energy Dispersive x-ray micro analysis system</th>
</tr>
</thead>
<tbody>
<tr>
<td>Element detection range Boron to Uranium.</td>
</tr>
<tr>
<td>LN2 free motorized retractable SDD x-ray detector (with protective window) of at least 65 mm² area or more with energy resolution of better than 127 eV at Mn Kα line. Provision for high sensitivity light element analysis.</td>
</tr>
<tr>
<td>Necessary software should be provided for Qualitative, fully quantitative (with standards), and standard less quantitative elemental analysis.</td>
</tr>
<tr>
<td>Preferably a standard data set for quantitative analysis at low energy (&lt;5KV) may also be included.</td>
</tr>
<tr>
<td>Image acquisition and processing software should be provided for the x-ray images. Image mixing and overlapping of multiple elemental scans</td>
</tr>
</tbody>
</table>
with false color should be possible, along with the SEM image. Multiple line scan displays and comparison.

- Software for peak fitting, peak count, pulse pile-up rejection, background subtraction and quantitative analysis should be provided.
- Provision for area scan, line scan (for simultaneous acquisition from at least 8 element windows. Single point and multipoint acquisition with a grid on the sample. Magnification should be same as that on SEM. Possibility to reduce raster without changing the mag on microscope. Software provision for comparison of two or more spectra and display of more than one spectrum in single screen should be there.
- The EDS system should be completely compatible with the quoted SEM system.
- A separate computer and monitor to be provided for EDS analysis. Also, the possibility to simultaneously display image (with 1:1 correspondence with the SEM image) showing the point of interest and the spectra should be there.
- Vendor should provide full interfacing of the EDS system with the SEM including the necessary hardware and software.
- Calibration standard samples for stoichiometry standardizations should be provided with the system; including pure metals (Au), oxides, nitrides, alloys etc. All the samples should be mounted on stubs for ease of use. The standard sample provided should clearly distinguish the peaks between oxygen and nitrogen for EDS system. Calibration certificate shall be provided with all the above standard samples.
- Vendor to provide three years warranty on the EDS system.

### II. Sample preparation

- Vendor should provide a Sputter Coater with gold target of at least 4-inch size for coating insulator samples. The sputter coater should be complete with automatic oil free vacuum system consisting of TMP backed by roughing pump, thickness monitor. Provision for mounting multiple samples should be provided.
- Vendor should also quote for a Nomarski optical microscope with digital image facility for previewing of the samples from reputed suppliers like Zeiss, Olympus and Nikon. The microscope should be complete with viewing facility, digital image acquisition and display with computer having image processing software. Sample stage with x,y and z movements. Multiple objectives of 10x, 20x, 50x and 100x etc to reach a maximum magnification of 2000.

### III. Low Temperature Stage for FESEM

#### Low temperature stage for EBIC and CL measurements compatible with the SEM

- Temperature range 300 K to 80K or better.
- The stage should be complete with mounting frame, vibration isolation, cold shield, feedthrough for the electrical cables, nitrogen reservoir, and temperature controller for controlling the temperature with an accuracy of 1 K or better.
- Sample size – 10 mm² or higher.
- The system should be compatible with CL systems for low temperature CL measurements.
- Spares consumables and maintenance kit including the low temperature glue and the sample holders.
- Installation and demonstration of system performance.
- One-week on-site training after the installation is completed.
- Vendor will also show the compatibility of the LT stage with CL systems.

| AMC/CMC       | Vendor to quote for the additional five-year maintenance and after sales service contract. |

A complete set of tender documents* may be Download by prospective bidder free of cost from the website [http://eprocure.gov.in/eprocure/app](http://eprocure.gov.in/eprocure/app). Bidder has to make payment of requisite fees (i.e. Tender fees (if any) and EMD) online through RTGS/NEFT only.
Terms & Conditions Details

<table>
<thead>
<tr>
<th>Sl.No.</th>
<th>Specification</th>
</tr>
</thead>
<tbody>
<tr>
<td>1.</td>
<td><strong>Due date:</strong> The tender has to be submitted on-line before the due date. The offers received after the due date and time will not be considered. No manual bids will be considered.</td>
</tr>
<tr>
<td>2.</td>
<td><strong>Preparation of Bids:</strong> The offer/bid should be submitted in two bid systems (i.e.) Technical bid and financial bid. The technical bid should consist of all technical details along with commercial terms and conditions. Financial bid should indicate item wise price for the items mentioned in the technical bid in the given format i.e BoQ_XXXX. The Technical bid and the financial bid should be submitted Online. <strong>Note:</strong> Comparison of prices will be done ONLY on the bids submitted for the Main Equipment and anything asked as ‘Optional’ in the specs is not to be included for overall comparison.</td>
</tr>
<tr>
<td>3.</td>
<td><strong>EMD (if applicable):</strong> The tenderer should submit an EMD amount through RTGS/NEFT. The Technical Bid without EMD would be considered as UNRESPONSIVE and will not be accepted. The EMD will be refunded without any interest to the unsuccessful bidders after the award of contract. Refer to Schedule (at page 1 of this document) for its actual place of submission.</td>
</tr>
<tr>
<td>4.</td>
<td><strong>Refund of EMD:</strong> The EMD will be returned to unsuccessful Tenderer only after the Tenders are finalized. In case of successful Tenderer, it will be retained till the successful and complete installation of the equipment.</td>
</tr>
<tr>
<td>5.</td>
<td><strong>Opening of the tender:</strong> The online bid will be opened by a committee duly constituted for this purpose. Online bids (complete in all respect) received along with EMD (if any) will be opened as mentioned at “Annexure: Schedule” in presence of bidders representative if available. Only one representative will be allowed to participate in the tender opening. Bid received without EMD (if present) will be rejected straight way. The technical bid will be opened online first and it will be examined by a technical committee (as per specification and requirement). The financial offer/bid will be opened only for the offer/bid which technically meets all requirements as per the specification, and will be opened in the presence of the vendor’s representatives subsequently for further evaluation. The bidders if interested may participate on the tender opening Date and Time. The bidder should produce authorization letter from their company to participate in the tender opening.</td>
</tr>
<tr>
<td>6.</td>
<td><strong>Acceptance/ Rejection of bids:</strong> The Committee reserves the right to reject any or all offers without assigning any reason.</td>
</tr>
</tbody>
</table>
| 7.     | **Pre-qualification criteria:**  
  (i) Bidders should be the manufacturer / authorized dealer. Letter of Authorization from original equipment manufacturer (OEM) on the same and specific to the tender should be enclosed.  
  (ii) An undertaking from the OEM is required stating that they would facilitate the bidder on a regular basis with technology/product updates and extend support for the warranty as well. (Ref. Annexure-II)  
  (iii) OEM should be internationally reputed Branded Company.  
  (iv) Non-compliance of tender terms, non-submission of required documents, lack of clarity of the specifications, contradiction between bidder specification and supporting documents etc. may lead to rejection of the bid.  
  (v) In the tender, either the Indian agent on behalf of the Principal/OEM or Principal/OEM itself can bid but both cannot bid simultaneously for the same item/product in the same tender.  
  (vi) If an agent submits bid on behalf of the Principal/OEM, the same agent shall not submit a bid on behalf of another Principal/OEM in the same tender for the same item/product. |
<p>| 8.     | <strong>Performance Security:</strong> The supplier shall require to submit the performance security in the form of irrevocable bank guarantee issued by any Indian Nationalized Bank/ Foreign Bank (if local representative is not involved) for an amount which is stated at page #1 of the tender document. The performance security should be kept valid for a period of 21 days after the expiry of the warranty period specified in the tender document. |</p>

<td></td>
</tr>
</tbody>
</table>
The price should be quoted without custom duty and excise duty, since IIT Delhi is exempted from payment of Excise Duty and is eligible for concessional rate of custom duty. Necessary certificate will be issued on demand. **In case of imports, the price should be quoted on FOB/FCA origin Airport Basis only.** Under special circumstances (eg. perishable chemicals), when the item is imported on CIF/CIP, please indicate CIF/CIP charges separately upto IIT Delhi indicating the mode of shipment. IIT Delhi will make necessary arrangements for the clearance of imported goods at the Airport/Seaport. Hence the price should not include the above charges. **At any circumstances, it is the responsibility of the foreign supplier to handover the material to our forwarder at the origin airport after completing all the inland clearing.**

“In case of CIF/CIP shipments, kindly provide the shipment information at least 2 days in advance before landing the shipment along with the documents i.e. invoice, packing list, forwarder Name, address, contact No. in India to save penalty/demurrage charges (imposed by Indian Customs). Otherwise these charges will be recovered from the supplier/Indian Agent.”

**Note:** - **Comparison of prices will be done ONLY on the bids submitted for the Main Equipment and anything asked as ‘Optional’ in the specs is not to be included for overall comparison.**

---

### Evaluation of Price/Financial Bid:

For the bids surviving the technical evaluation which have been found to be responsive the evaluation & comparison shall be made as under:

1. **If the response to the tender consists only of Indigenous Offers**

   (i) The final landing cost of purchase after all discounts, freight, forwarding, insurance, taxes etc. shall be the basis of evaluation.

   (ii) In the case of goods manufactured in India or goods of foreign origin already located in India, GST and excise duty (if applicable) and other similar taxes and duties, which will be contractually payable (to the tenderer) on the goods are to be added and will be considered in determination of evaluation criteria for L-1 in those cases where only Indian bidders are competing.

2. **If the response to the tender consists only of Imported Offers**

   (i) The FOB/FCA price shall be the basis of evaluation. **Please make sure that your Price Bid mentions FOB/FCA prices clearly and not just CIF/CIP prices directly OTHERWISE for the purpose of comparison such CIF/CIP price will be taken into account.**

   (ii) In cases where all the offers are from foreign suppliers, ranking will be assessed on FOB/FCA basis. In the case of goods of foreign origin offered from abroad, customs duty and other similar import duties/taxes, which will be contractually payable (to the tenderer) on the goods, are to be added;

   (iii) All the foreign quotes will be brought to a common denomination in Indian Rupees by adopting the Selling exchange rate of the RBI/State Bank of India on the date of the opening of Price/financial Bids.

3. **If the response to the tender consists of Imported as well as Indigenous Offers**
The comparison between the indigenous and the foreign offers shall be made on the final landing cost of purchase taking into account, freight, forwarding, insurance, taxes etc. as specified in clause 1(i) and (ii) and for bids in foreign currency as per clause 2 (i), (ii) & (iii)

Further, adding advalorem/custom duty/countervailing duty (as applicable) at the rate of 9.34% on price quoted on FOB/FCA term including cost for safe Unloading and all other costs for all activities as per scope of work basis. IIT Delhi will submit Custom Duty Exemption Certificate under clause no.51/96.

16. Notices: For the purpose of all notices, the following shall be the address of the Purchaser and Supplier.

**Purchaser:** Prof. Rajendra Singh  
Department of Physics  
Indian Institute of Technology  
Hauz Khas, New Delhi - 110016.

**Supplier:** (To be filled in by the supplier)  
*(All supplier’s should submit its supplies information as per Annexure-II).*

17. Progress of Supply: Wherever applicable, supplier shall regularly intimate progress of supply, in writing, to the Purchaser as under:

1. Quantity offered for inspection and date;  
2. Quantity accepted/rejected by inspecting agency and date;  
3. Quantity dispatched/delivered to consignees and date;  
4. Quantity where incidental services have been satisfactorily completed with date;  
5. Quantity where rectification/repair/replacement effected/completed on receipt of any communication from consignee/Purchaser with date;  
6. Date of completion of entire Contract including incidental services, if any; and  
7. Date of receipt of entire payments under the Contract (In case of stage-wise inspection, details required may also be specified).

18. Inspection and Tests: Inspection and tests prior to shipment of Goods and at final acceptance are as follows:

- After the goods are manufactured and assembled, inspection and testing of the goods shall be carried out at the supplier’s plant by the supplier, prior to shipment to check whether the goods are in conformity with the technical specifications attached to the purchase order. Manufacturer’s test certificate with data sheet shall be issued to this effect and submitted along with the delivery documents. The purchaser shall be present at the supplier’s premises during such inspection and testing if need is felt. The location where the inspection is required to be conducted should be clearly indicated. The supplier shall inform the purchaser about the site preparation, if any, needed for installation of the goods at the purchaser’s site at the time of submission of order acceptance.

- The acceptance test will be conducted by the Purchaser, their consultant or other such person nominated by the Purchaser at its option after the equipment is installed at purchaser’s site in the presence of supplier’s representatives. The acceptance will involve trouble free operation and ascertaining conformity with the ordered specifications and quality. There shall not be any additional charges for carrying out acceptance test. No malfunction, partial or complete failure of any part of the equipment is expected to occur. The Supplier shall maintain necessary log in respect of the result of the test to establish to the entire satisfaction of the Purchaser, the successful completion of the test specified.

- In the event of the ordered item failing to pass the acceptance test, a period not exceeding one
weeks will be given to rectify the defects and clear the acceptance test, failing which the Purchaser reserve the right to get the equipment replaced by the Supplier at no extra cost to the Purchaser.

- Successful conduct and conclusion of the acceptance test for the installed goods and equipment shall also be the responsibility and at the cost of the Supplier.

19. **Resolution of Disputes**: The dispute resolution mechanism to be applied pursuant shall be as follows:
- In case of Dispute or difference arising between the Purchaser and a domestic supplier relating to any matter arising out of or connected with this agreement, such disputes or difference shall be settled in accordance with the Indian Arbitration & Conciliation Act, 1996, the rules there under and any statutory modifications or re-enactments thereof shall apply to the arbitration proceedings. The dispute shall be referred to the Director, Indian Institute of Technology (IIT) Delhi and if he is unable or unwilling to act, to the sole arbitration of some other person appointed by him willing to act as such Arbitrator. The award of the arbitrator so appointed shall be final, conclusive and binding on all parties to this order.
- In the case of a dispute between the purchaser and a Foreign Supplier, the dispute shall be settled by arbitration in accordance with provision of sub-clause (a) above. But if this is not acceptable to the supplier then the dispute shall be settled in accordance with provisions of UNCITRAL (United Nations Commission on International Trade Law) Arbitration Rules.
- The venue of the arbitration shall be the place from where the order is issued.

20. **Applicable Law**: The place of jurisdiction would be New Delhi (Delhi) INDIA.

21. **Right to Use Defective Goods**
If after delivery, acceptance and installation and within the guarantee and warranty period, the operation or use of the goods proves to be unsatisfactory, the Purchaser shall have the right to continue to operate or use such goods until rectifications of defects, errors or omissions by repair or by partial or complete replacement is made without interfering with the Purchaser’s operation.

22. **Supplier Integrity**
The Supplier is responsible for and obliged to conduct all contracted activities in accordance with the Contract using state of the art methods and economic principles and exercising all means available to achieve the performance specified in the contract.

23. **Training**
The Supplier is required to provide training to the designated Purchaser’s technical and end user personnel to enable them to effectively operate the total equipment.

24. **Installation & Demonstration**
The supplier is required to done the installation and demonstration of the equipment within one month of the arrival of materials at the IITD site of installation, otherwise the penalty clause will be the same as per the supply of materials.

In case of any mishappening/damage to equipment and supplies during the carriage of supplies from the origin of equipment to the installation site, the supplier has to replace it with new equipment/supplies immediately at his own risk. Supplier will settle his claim with the insurance company as per his convenience. IITD will not be liable to any type of losses in any form.

25. **Insurance**: For delivery of goods at the purchaser’s premises, the insurance shall be obtained by the supplier in an amount equal to 110% of the value of the goods from "warehouse to warehouse" (final destinations) on “All Risks" basis including War Risks and Strikes. The insurance shall be valid for a period of not less than 3 months after installation and commissioning. **In case of orders placed on FOB/FCA basis, the purchaser shall arrange Insurance. If orders placed on CIF/CIP basis, the insurance should be up to IIT Delhi.**

26. **Incidental services**: The incidental services also include:
- Furnishing of 01 set of detailed operations & maintenance manual.
- Arranging the shifting/moving of the item to their location of final installation within IITD
27. **Warranty:**
   (i) Warranty period shall be (as stated at page #2 of this tender) from date of installation of Goods at the IITD site of installation. The Supplier shall, in addition, comply with the performance and/or consumption guarantees specified under the contract. If for reasons attributable to the Supplier, these guarantees are not attained in whole or in part, the Supplier shall at its discretion make such changes, modifications, and/or additions to the Goods or any part thereof as may be necessary in order to attain the contractual guarantees specified in the Contract at its own cost and expense and to carry out further performance tests. The warranty should be comprehensive on site.
   (ii) The Purchaser shall promptly notify the Supplier in writing of any claims arising under this warranty. Upon receipt of such notice, the Supplier shall immediately within in 02 days arrange to repair or replace the defective goods or parts thereof free of cost at the ultimate destination. The Supplier shall take over the replaced parts/goods at the time of their replacement. No claim whatsoever shall lie on the Purchaser for the replaced parts/goods thereafter. The period for correction of defects in the warranty period is 02 days. If the supplier having been notified fails to remedy the defects within 02 days, the purchaser may proceed to take such remedial action as may be necessary, at the supplier’s risk and expenses and without prejudice to any other rights, which the purchaser may have against the supplier under the contract.
   (iii) The warranty period should be clearly mentioned. The maintenance charges (AMC) under different schemes after the expiry of the warranty should also be mentioned. The comprehensive warranty will commence from the date of the satisfactory installation/commissioning of the equipment against the defect of any manufacturing, workmanship and poor quality of the components.
   (iv) After the warranty period is over, Annual Maintenance Contract (AMC)/Comprehensive Maintenance Contract (CMC) up to next two years should be started. The AMC/CMC charges will not be included in computing the total cost of the equipment.

28. **Governing Language**
The contract shall be written in English language. English language version of the Contract shall govern its interpretation. All correspondence and other documents pertaining to the Contract, which are exchanged by the parties, shall be written in the same language.

29. **Applicable Law**
The Contract shall be interpreted in accordance with the laws of the Union of India and all disputes shall be subject to place of jurisdiction.

30. **Notices**
- Any notice given by one party to the other pursuant to this contract/order shall be sent to the other party in writing or by cable, telex, FAX or e mail and confirmed in writing to the other party’s address.
- A notice shall be effective when delivered or on the notice’s effective date, whichever is later.

31. **Taxes**
Suppliers shall be entirely responsible for all taxes, duties, license fees, octroi, road permits, etc., incurred until delivery of the contracted Goods to the Purchaser. However, GST etc, in respect of the transaction between the Purchaser and the Supplier shall be payable extra, if so stipulated in the order.

For research purpose(s) ONLY, 5% GST will be applicable with concessional GST Certificate.

32. **Duties**
IIT Delhi is exempted from paying custom duty under notification No.51/96 (partially or full) and necessary “Custom Duty Exemption Certificate” can be issued after providing following information and Custom Duty Exemption Certificate will be issued to the shipment in the name of the Institute, (no certificate will be issued to third party): The procured product should be used for teaching, scientific and research work only.

| a) | Shipping details i.e. Master Airway Bill No. and House Airway No. (if exists)  
| b) | Forwarder details i.e. Name, Contact No., etc. |

IIT Delhi is partially exempted from paying GST and necessary GST Exemption Certificate will be provided for which following information are required.

b) Quotation details of Basic Price, Rate, Tax & Amount on which ED is applicable  
c) Supply Order Copy  
d) Proforma-Invoice Copy.

### 33. Agency Commission:
Agency commission if any will be paid to the Indian agent in Rupees on receipt of the equipment and after satisfactory installation. Agency Commission will not be paid in foreign currency under any circumstances. The details should be explicitly shown in Tender even in case of Nil commission. The tenderer should indicate the percentage of agency commission to be paid to the Indian agent.

### 34. Payment:
(i) For imported items Payment will be made through irrevocable Letter of Credit (LC) Cash Against Documents (CAD)/Against delivery/after satisfactory installation by T.T. Letter of Credit (LC) will be established in favour of foreign Supplier after the submission of performance security. The letter of credit (LC) will be established on the exchange rates as applicable on the date of establishment. For Imports, LC will be opened for 100% FOB/CIF value. 80% of the LC amount shall be released on presentation of complete and clear shipping documents and 20% of the LC amount shall be released after the installation and demonstration of the equipment at the INST site of installation in faultless working condition for period of 60 days from the date of the satisfactory installation and subject to the production of unconditional performance bank guarantee as specified in Clause 8 of tender terms and conditions.

(ii) For Indigenous supplies, 100% payment shall be made by the Purchaser against delivery, inspection, successful installation, commissioning and acceptance of the equipment at IITD in good condition and to the entire satisfaction of the Purchaser and on production of unconditional performance bank guarantee as specified in Clause 9 of tender terms and conditions.

(iii) Indian Agency commission (IAC), if any shall be paid after satisfactory installation & commissioning of the goods at the destination at the exchange rate prevailing on the date of negotiation of LC documents, subject to DGS&D registration for restricted items.

(iv) All the bank charges within India will be borne by the Institute and outside India will be borne by the Supplier.

### 35. User list:
Brochure detailing technical specifications and performance, list of industrial and educational establishments where the items enquired have been supplied must be provided. (Ref. Annexure-III)

### 36. Manuals and Drawings:
(i) Before the goods and equipment are taken over by the Purchaser, the Supplier shall supply operation and maintenance manuals. These shall be in such details as will enable the Purchaser to operate, maintain, adjust and repair all parts of the works as stated in the specifications.

(ii) The Manuals shall be in the ruling language (English) in such form and numbers as stated in the contract.

(iii) Unless and otherwise agreed, the goods equipment shall not be considered to be completed for the purposes of taking over until such manuals and drawing have been supplied to the Purchaser.

### 37. Application Specialist:
The Tenderer should mention in the Techno-Commercial bid the availability and names of Application Specialist and Service Engineers in the nearest regional office. (Ref. to Annexure-III)

### 38. Site Preparation:
The supplier shall inform to the Institute about the site preparation, if any, needed for the installation of equipment, immediately after the receipt of the purchase order. The supplier must provide complete details regarding space and all the other infrastructural requirements needed
The Institute shall arrange for the installation of the equipment before the equipment arrives to ensure its timely installation and smooth operation thereafter.

The supplier shall visit the Institute and see the site where the equipment is to be installed and may offer his advice and render assistance to the Institute in the preparation of the site and other pre-installation requirements.

39. **Spare Parts**

The Supplier may be required to provide any or all of the following materials, notifications, and information pertaining to spare parts manufactured or distributed by the Supplier:

i. Such spare parts as the Purchaser may elect to purchase from the Supplier, providing that this election shall not relieve the Supplier of any warranty obligations under the Contract; and

ii. In the event of termination of production of the spare parts:

iii. Advance notification to the Purchaser of the pending termination, in sufficient time to permit the Purchaser to procure needed requirements; and

iv. Following such termination, furnishing at no cost to the Purchaser, the blueprints, drawings and specifications of the spare parts, if requested.

Supplier shall carry sufficient inventories to assure ex-stock supply of consumable spares for the Goods, such as gaskets, plugs, washers, belts etc. Other spare parts and components shall be supplied as promptly as possible but in any case within six months of placement of order.

40. **Defective Equipment**: If any of the equipment supplied by the Tenderer is found to be substandard, refurbished, un-merchantable or not in accordance with the description/specification or otherwise faulty, the committee will have the right to reject the equipment or its part. The prices of such equipment shall be refunded by the Tenderer with 18% interest if such payments for such equipment have already been made. All damaged or unapproved goods shall be returned at suppliers cost and risk and the incidental expenses incurred thereon shall be recovered from the supplier. Defective part in equipment, if found before installation and/or during warranty period, shall be replaced within 45 days on receipt of the intimation from this office at the cost and risk of supplier including all other charges. In case supplier fails to replace above item as per above terms & conditions, IIT Delhi may consider "Banning" the supplier.

41. **Termination for Default**

The Purchaser may, without prejudice to any other remedy for breach of contract, by written notice of default sent to the Supplier, terminate the Contract in whole or part:

i. If the Supplier fails to deliver any or all of the Goods within the period(s) specified in the order, or within any extension thereof granted by the Purchaser; or

ii. If the Supplier fails to perform any other obligation(s) under the Contract.

iii. If the Supplier, in the judgment of the Purchaser has engaged in corrupt or fraudulent practices in competing for or in executing the Contract.

- For the purpose of this Clause:
  
  i. **Corrupt practice** means the offering, giving, receiving or soliciting of anything of value to influence the action of a public official in the procurement process or in contract execution.

  ii. **Fraudulent practice** means a misrepresentation of facts in order to influence a procurement process or the execution of a contract to the detriment of the Borrower, and includes collusive practice among Bidders (prior to or after bid submission) designed to establish bid prices at artificial non-competitive levels and to deprive the Borrower of the benefits of free and open competition;”

- In the event the Purchaser terminates the Contract in whole or in part, the Purchaser may procure, upon such terms and in such manner, as it deems appropriate, Goods or Services similar to those undelivered, and the Supplier shall be liable to the Purchaser for any excess costs for such similar Goods or Services. However, the Supplier shall continue the performance of the Contract to the
42. **Shifting**: After 1-2 years once our new Academic Block will be ready, the supplier has to shift and reinstall the instrument free of cost (if required).

43. **Downtime**: During the warranty period not more than 5% downtime will be permissible. For every day exceeding permissible downtime, penalty of 1/365 of the 5% FOB value will be imposed. Downtime will be counted from the date and time of the filing of complaint within the business hours.

44. **Training of Personnel**: The supplier shall be required to undertake to provide the technical training to the personnel involved in the use of the equipment at the Institute premises, immediately after completing the installation of the equipment for a minimum period of one week at the supplier’s cost.

45. **Disputes and Jurisdiction**: Any legal disputes arising out of any breach of contract pertaining to this tender shall be settled in the court of competent jurisdiction located within New Delhi.

46. **Compliance certificate**: This certificate must be provided indicating conformity to the technical specifications. (Annexure-I)

47. **As per Ministry of Finance, Deptt. of Expenditure, Public Procurement Division Order (Public Procurement No.1) issued from file No.6/18/2019-PPD dated 23rd July, 2020**

Regarding Restrictions under Rule 144 (xi) of the General Financial Rules (GFRs) 2017, it is directed that any bidder from a country which shares a land border with India will be eligible to bid in any procurement whether of goods, services (including consultancy services and non-consultancy services) or works (including turnkey projects) only if the bidder is registered with the Competent Authority i.e. the Deptt. for Promotion of Industry and Internal Trade (DPIIT). The said order will not apply to bidders from those countries (even sharing a land border with India) to which the Government of India has extended lines of credit or in which the Government of India is engaged in development projects (updated lists of the countries are given in the Ministry of External Affairs).

“Bidder” (including the term ‘tenderer’, ‘consultant’ or ‘service provider’ in certain contexts) means any person or firm or company, including any member of a consortium or joint venture (that is an association of several persons, or firms or companies), every artificial juridical person not falling in any of the descriptions of bidders stated hereinbefore, including any agency branch or office controlled by such person, participated in a procurement process.

“Bidders from a country which shares a land border with India” for the purpose of this Order means:

i. An entity incorporated, established or registered in such a country; or

ii. A subsidiary of an entity incorporated, established or registered in such a country; or

iii. An entity substantially controlled through entities incorporated, established or registered in such a country; or

iv. An entity whose beneficial owner is situated in such a country; or

v. An Indian (or other) agent of such an entity; or

vi. A natural person who is the citizen of such a country; or

vii. A consortium or joint venture where any member of the consortium or joint venture falls under any of the above.

The beneficial owner for the purpose of above will be as under: -

1. In case of a company or Limited Liability Partnership, the beneficial owner is the natural person(s), who, whether acting alone or together, or through one or more juridical person, has a controlling ownership interest or who exercise control through other means.

Explanation-

a. “Controlling ownership interest” means ownership of or entitlement to more than twenty-
five per cent of share or capital or profit of the company;
b. “Control” shall include the right to appoint majority of the directors or to control the
management of policy decisions including by virtue of their shareholding or management
rights or shareholders agreements or voting agreements;

2. In case of a partnership firm, the beneficial owner is the natural person(s) who, whether acting
alone or together, or through one or more juridical person, has ownership of entitlement to more
than fifteen percent of capital or profits of the partnership;
3. In case of an unincorporated association or body of individuals, the beneficial owner is the
natural person(s), who, whether acting alone or together, or through one or more juridical
person, has ownership of or entitlement to more than fifteen percent of the property or capital or
profits of such association or body of individuals;
4. Where no natural person is identified under (1) or (2) or (3) above, the beneficial owner is the
relevant natural person who holds the position of senior managing official;
5. In case of a trust, the identification of beneficial owner(s) shall include identification of the
author of the trust, the trustee, the beneficiaries with fifteen percent or more interest in the trust
and any other natural person exercising ultimate effective control over the trust through a chain
of control or ownership.

An agent is a person employed to do any act for another, or to represent another in dealings with the
third person.

For Works contracts, including Turnkey contracts, the successful bidder shall not be allowed to sub-
contract works to any contractor from a country which shares a land border with India unless such
contractor is registered with the Competent Authority.

A certificate shall be submitted by bidders in the tender documents regarding their
compliance with the said order. If the certificate submitted by a bidder whose bid is accepted is
found to be false, this would be a ground for immediate termination and further legal action in
accordance with law. Annexure VI (For Goods/ Services contracts)/ Annexure VII (For Works
contracts, including Turnkey contracts)
## TECHNICAL SPECIFICATION

Field Emission Scanning Electron Microscope System with Spectroscopic Cathodoluminescence, and Low temperature stage as a complete system.

<tr>
<td><strong>B. Field Emission Scanning Electron Microscope</strong></td>
<td></td>
</tr>
</tbody>
</table>
| 1. Resolution: | 0.7 nm or better at 15 KV (vendor to submit the document showing the ultimate resolution at 15 KV and 1 KV)  
1.2 nm or better at 1 KV |
| 2. Accelerating Voltage | ≤ 0.2−30 kV or better and continuously variable through software or controlling knob. |
| 3. Magnification | 25 to 10, 00,000 or higher continuously variable with auto compensation for change in working distance and accelerating voltage. |
| 4. Probe current | 5pA to 200 nA or better.  
The system should have provision for probe current measurements and setting desired values of probe current for any arbitrary KV during an experiment. |
| 5. Specimen stage | All 5-axis motorized eucentric stage with minimum movements in X=100 mm, Y=100 mm, Z=50 mm, Tilt= -4 to 70 degrees (continuous) and rotation 0-360 degrees (continuous).  
Provision for computerized stage position storage and retrieval. Measurement on a grid with desired number of points and at several locations with image stitching. |
| 6. Electron optical column | Should be complete with:  
Schottky thermal field emission source.  
Set of beam defining apertures, auto beam and aperture alignment, auto Focus, contrast and brightness, Adjustable stigmator, |
variable scan speed, scan rotation, tilt correction, EM metal shielding of column.

- Beam Deceleration/gentle beam or equivalent to prevent sensitive sample charging and high-resolution imaging at low kV.
- Magnetic and Electrostatic/ Super Hybrid lens/ Compound lens assembly for high resolution imaging of magnetic materials with shorter working distance.
- SEM chamber and Electron gun should have a built in, fully integrated self-levelling pneumatic vibration isolation.
- Full computer controls of the electron optical column and microscope function like; probe current, probe diameter, gun alignment, focus (with automatic compensation for Operating voltage change, tilt, and rotation), stigmator, etc.

7. Specimen Holders

- Standard Sample holder for 2”, 3” and 4” circular wafers; multi specimen holder; pin/cylindrical stubs, etc. Carousel for mounting of at least six specimens.
- Cross-sectional sample holder for holding variable sample thicknesses from 100 um to 1mm.
- Stubs for the carousel (24 spare stubs) with box to keep them.

8. Detectors

1. ET detector for secondary electron imaging
2. In-lens/in column/upper SED Secondary Electron detector
3. Backscattered electron Detectors for high resolution BSE imaging at low accelerating voltages (≤0.5KV).
4. In chamber IR camera fully compatible with the imaging.

9. Scan Modes

- Such as raster scan with different scan speeds, spot mode, line scan mode, Depth of field mode, line scan profile, and scan rotation mode to be provided. Split screen and live multiple signal display (at least four).
<p>| | |</p>
<table>

</thead>
<tbody>
<tr>
<td><strong>10. Image display and record system</strong></td>
<td>• Separate High resolution 21”, or more, flat color monitor for flicker free TV-scan image, provision for digital image storage and processing, Line profile display, image annotation facilities, etc.</td>
</tr>
</tbody>
</table>
| **11. Image processing** | • Software to include standard functions like line and frame averaging, scan integration, and facility for measurements of distance, angle, and diameter, pseudo color display, split screen imaging mode, PIP, camera and scan mode simultaneously, frame store with variable image resolution from low to ultra-high value.  
• Possibility for automatic acquisition at several locations and image stitching should be provided. Complete compatibility with other software like for EDS and CL in terms of area selection, spectrum acquisition and other should be provided. |
| **12. PC control** | • Microsoft windows (latest version) compatible control software for complete system control including the HV, Vacuum system, scanning conditions, and image recording and storage etc. with auto focus, brightness, contrast etc. |
| **13. Computer control system** | • Vendor to provide the required computer system complete with 21” (or more) flat color monitor and necessary hardware and controls and preloaded with control software. Computer specs should be better than 64 bit processor, 32 GB RAM, 1TB SSD hard disk space, USB ports onboard graphics and necessary ports for connecting all the accessories. |
| **14. Spare accessories ports** | • (at least 10) on the chamber for addition of attachments like, Spectroscopic Cathodoluminescence, Low temperature stage, and Energy Dispersive Spectrometer. And also, for future addition of EBIC and EBSD. |
| 16. Vacuum system | • Fully computer controlled vacuum system complete with oil free turbo molecular pump, suitable clean backing pump (oil free), ion getter pump, dry nitrogen venting provision, vacuum readout and display.  
• The system should be fully automatic with interlocking safeguards provided against power failure and any sudden shut down. The ultimate vacuum achievable should be better than $10^{-5}$Torr in the sample chamber. |
|---|---|
| 17. Utilities | • Vendor to quote essential utilities like cooling water circulation system (air cooled),  
• oil free compressor with moisture trap and including the pipes and connectors and any other thing required for system operation. Table for operation console etc.  
• Also, adequate Safety provisions for vacuum, water leakage, power, N2 leakage should be available. |
| 18. User Interface | • All the accessories required for the user interface should be provided with the system like; Keyboard, Mouse, Control panel with multifunction for the control and adjustment of frequently used SEM parameters, Manual Joystick control for stage axis. |

B. Spectroscopic Cathodoluminescence

Cathodoluminescence imaging and spectroscopy system compatible with the column (as detailed below)

• Cathodoluminescence collection optics consisting of retractable, diamond turned paraboloidal mirror with direct optical coupling to the monochromator for high collection sensitivity.  
• System should be capable of self-aligning and alignment routine should be capable of locating the sample at the focal point of the collection optics. Collection mirror should align to the electron optical axis delivering optimized collection efficiency and repeatable results.  
• Optional mirror thin enough to
enable working at low working distances should be quoted.

- Highly sensitive detectors covering the Wavelength ranges 190 nm – 1100 nm. This should include a high sensitivity cooled photomultiplier tube and CCD detector with suitable (preferably 1200 lines/mm blazed at 500 nm and 2400 lines/mm blazed at 240 nm) gratings.

- The wavelength resolution should be better than 0.2 nm in visible range.

- System electronics for control of monochromator and detector for viewing /recording of wavelength resolved spectrum as well as high resolution panchromatic and monochromatic CL images simultaneously with other imaging signals like SE.

- Spectrum /image acquisition and processing software. The software should be capable of digital acquisition, display and storing of monochromatic as well as panchromatic images, superimposition of various monochromatic images and pseudo coloring of images, image annotation for text entry on any part of the image and should have various measurement functions.

- Image and spectra processing, curve fitting, and spectra processing like multiple display, image stitching, normalization, peak fitting etc., software to be provided.

- Capability of hyperspectral data collection using CCD and PMT detectors should be provided.

- Wavelength calibration standards to be provided by the vendor. Vendor to also provide calibration curves for detectors, Gratings and whole optical bench.

- System should be compatible with the FESEM and suitable interface for mounting it on the SEM column and for connecting it to the microscope.
optics are to be provided by the vendor.  
- It should be ensured that the area scanned in the SEM image is same as the CL image frame.  
- Possibility to take spectra at constant beam power by controlling the probe current.  
- The system should be compatible with a low temperature stage to be attached in the FESEM.  
- The system should be upgradable in future to accept other modes like angle resolved spectroscopy, polarization filtered spectroscopy etc.

### C. Other Requirements

<table>
<thead>
<tr>
<th>1. Spares consumables</th>
<th></th>
</tr>
</thead>
</table>
| • One set each of Complete aperture set, metal seals, roughing pump repair kit, and assorted Fuses  
• Spare specimen holders.  
• Vendor should also provide specimen handling tools and stage tools.  
• silver paste (4 bottles 100ml each), carbon tape (at least 6 rolls), copper tape (6 rolls) of at least 50 meters length.  
• Vendor should also provide a spare similar as above, copy of the operating system and back up of all the FESEM application and system control software on a similar standby computer. |

<table>
<thead>
<tr>
<th>2. Manuals</th>
<th></th>
</tr>
</thead>
</table>
| • Vendor to provide compulsorily complete set of service and maintenance manuals (a hard copy and in soft media) including the lay out diagrams and circuit diagrams for all electronic boards and mechanical components of FESEM system and  
• Spectroscopic Cathodoluminescence |

<table>
<thead>
<tr>
<th>3. Calibration Standards</th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>• Standard test sample to be provided by the vendor to demonstrate the ultimate resolution on FESEM.</td>
<td></td>
</tr>
</tbody>
</table>
4. Installation and Training

- It will be the responsibility of the supplier to:
  - Provide complete installation of FESEM with all utilities and accessories (CL). Demonstration of full specifications using standards (to be provided by the vendors) for all the parameters in respect of FESEM, CL.
  - Two weeks on-site training on system operation and imaging after the installation is over.
  - Installation and demonstration of system performance and training of CL system.

5. Warranty

- Vendor to provide three-year warranty on the whole system including the FEG Gun.
- Vendor to provide three years warranty on accessories on the entire CL system.
- All expenses (including freight, customs etc) to be borne by the vendor during warranty period for replacement/repair of the faulty items.
- Vendor to have a good service network and a response time of two days in case of reported fault.
- Warranty for each component should be indicated separately.

Optional Items to be quoted separately

<table>
<thead>
<tr>
<th>I. Energy Dispersive X-ray Microanalysis System</th>
<th>Compliance (Yes/No)</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Energy Dispersive x-ray microanalysis system</strong></td>
<td></td>
</tr>
<tr>
<td>• Element detection range Boron to Uranium.</td>
<td></td>
</tr>
<tr>
<td>• LN$_2$ free motorized retractable SDD x-ray detector (with protective window) of at least 65 mm$^2$ area or more with energy resolution of better than 127 eV at Mn K$\alpha$ line. Provision for high sensitivity light element analysis.</td>
<td></td>
</tr>
<tr>
<td>• Necessary software should be</td>
<td></td>
</tr>
</tbody>
</table>
provided for Qualitative, fully quantitative (with standards), and standard less quantitative elemental analysis.
- Preferably a standard data set for quantitative analysis at low energy (<5KV) may also be included.
- Image acquisition and processing software should be provided for the x-ray images. Image mixing and overlapping of multiple elemental scans with false color should be possible, along with the SEM image. Multiple line scan displays and comparison.
- Software for peak fitting, peak count, pulse pile-up rejection, background subtraction and quantitative analysis should be provided.
- Provision for area scan, line scan (for simultaneous acquisition from at least 8 element windows. Single point and multipoint acquisition with a grid on the sample. Magnification should be same as that on SEM. Possibility to reduce raster without changing the mag on microscope. Software provision for comparison of two or more spectra and display of more than one spectrum in single screen should be there.
- The EDS system should be completely compatible with the quoted SEM system.
- A separate computer and monitor to be provided for EDS analysis. Also, the possibility to simultaneously display image (with 1:1 correspondence with the SEM image) showing the point of interest and the spectra should be there.
- Vendor should provide full interfacing of the EDS system with the SEM including the necessary hardware and software.
- Calibration standard samples for stoichiometry standardizations should be provided with the system; including pure metals (Au), oxides,
<table>
<thead>
<tr>
<th>Nitrides, alloys etc. All the samples should be mounted on stubs for ease of use. The standard sample provided should clearly distinguish the peaks between oxygen and nitrogen for EDS system. Calibration certificate shall be provided with all the above standard samples.</th>
</tr>
</thead>
<tbody>
<tr>
<td>• Vendor to provide three years warranty on the EDS system.</td>
</tr>
<tr>
<td><strong>II. Sample preparation</strong></td>
</tr>
<tr>
<td>• Vendor should provide a Sputter Coater with gold target of at least 4-inch size for coating insulator samples. The sputter coater should be complete with automatic oil free vacuum system consisting of TMP backed by roughing pump, thickness monitor. Provision for mounting multiple samples should be provided.</td>
</tr>
<tr>
<td>• Vendor should also quote for a Nomarski optical microscope with digital image facility for previewing of the samples from reputed suppliers like Zeiss, Olympus and Nikon. The microscope should be complete with viewing facility, digital image acquisition and display with computer having image processing software. Sample stage with x, y and z movements. Multiple objectives of 10x, 20x, 50x and 100x etc to reach a maximum magnification of 2000.</td>
</tr>
<tr>
<td><strong>III. Low Temperature Stage for FESEM</strong></td>
</tr>
<tr>
<td><strong>Low temperature stage for EBIC and CL measurements compatible with the SEM</strong></td>
</tr>
<tr>
<td>• Temperature range 300 K to 80 K or better.</td>
</tr>
<tr>
<td>• The stage should be complete with mounting frame, vibration isolation, cold shield, feedthrough for the electrical cables, nitrogen reservoir, and temperature controller for controlling the temperature with an accuracy of 1 K or better.</td>
</tr>
<tr>
<td>• Sample size – 10 mm² or higher.</td>
</tr>
<tr>
<td>• The system should be compatible with CL systems for low temperature CL measurements.</td>
</tr>
</tbody>
</table>
| • Spares consumables and maintenance kit including the low
- Installation and demonstration of system performance.
- One-week on-site training after the installation is completed.
- Vendor will also show the compatibility of the LT stage with CL systems.

We, ______________________________ hereby certify that all the information and data furnished by our organization with regard to this tender specification are true and complete to the best of our knowledge. I have gone through the specification, conditions and stipulations in details and agree to comply with the requirements and intent of specification.

This is certified that our organization has been authorized (Copy attached) by the OEM to participate in Tender. We further certified that our organization meets all the conditions of eligibility criteria laid down in this tender document. Moreover, OEM has agreed to support on regular basis with technology / product updates and extend support for the warranty.

The prices quoted in the financial bids are subsidized due to academic discount given to IIT Delhi.

Date: _________________________________
Tender No. :- .......................... Date: - ............

To
The Director,
Indian Institute of Technology Delhi,
New Delhi- 110016

Dear Sir,

We manufactures of original equipment at (…………………………..address of factory……………………………) do hereby authorize M/s (Name and address of Agent) to submit a bid, negotiate and receive the order format against your tender enquiry.

M/s. …………………………….. is authorized to bid and conclude the contract in regard to this business.

We hereby extend our full guarantee and warranty as per clause ………………………… of the terms and conditions NIQ for the goods and services offered by the above firm.

Yours Faithfully,

(Name)

(Name & Seal of Manufactures)

Note: -

1. **Items of indigenous nature or quoted in INR**, more than 1 authorized representative may participate in the same tender and submit their bids on behalf of their OEM/Principal/Manufacturer if the OEM permits more than one authorized bidder in such case as per their policy.

2. **In cases of agents quoting in offshore procurements**, on behalf of their principal manufacturers, one agent cannot represent two manufacturers or quote on their behalf in a particular tender enquiry. **One manufacturer can also authorize only one agent/dealer**

3. The letter of authority should be on the letterhead of the manufacturer and should be signed by a person competent and having the power of attorney to bind the manufacturer. The same should be included by the bidder in its techno-commercial unpriced bid.
CERTIFICATE

I have read the clause regarding restrictions on procurement from a bidder of a country which shares a land border with India and hereby certify that this bidder is not from such a country.

OR (whichever is applicable)

I have read the clause regarding restrictions on procurement from a bidder of a country which shares a land border with India and hereby certify that this bidder is from ___________ (Name of Country) and has been registered with the Competent Authority. I also certify that this bidder fulfills all the requirements in this regard and is eligible to be considered.

(Copy/ evidence of valid registration by the Competent Authority is to be attached)
