

Corrigendum to N.I.Q. for the purchase of a Bi-axial testing system

The following modifications to the NIQ Number 1466 placed on <http://www.iitd.ac.in/tenders> may please be noted:

1. Instead of servo-hydraulic drives, alternate drive mechanisms may be used if the performance specifications are being met.
2. The DA system may be 16 bit or better
3. Sampling frequency may be 35kHz per channel or better.
4. The last time for submission is changed to 10AM on Feb 11, 2013.
